**ISSUE:**

Cooperative Agreement with Utah Department of Transportation (UDOT) for the preconstruction and construction costs of the 3500 South Street Scape Improvements UDOT Project # STP-0171(13)0.

**SYNOPSIS:**

This agreement provides \$400,000.00 of federal funding for the construction of the project. The City is required to pay construction costs in excess of federal funding in the amount of \$364,704.75.

**BACKGROUND:**

In 2001, West Valley City applied for and received \$400,000.00 in Federal Transportation Enhancement Funds to build a sidewalk on the south side of 3500 South from Redwood Road to the Jordan River. Due to various right-of-way constraints, the project was moved onto the north side of the road. The project scope will include the construction of a new sidewalk, landscaping and sidewalk lighting. This cooperative agreement will allow the UDOT to advertise the project through their bid procurement system. The local match required on this project is \$100,000.00. UDOT is requiring that West Valley City deposit the amount of the project estimate that exceeds the programmed funds in the amount of \$364,704.75.

**RECOMMENDATION:**

Approval of the Cooperative Agreement with UDOT.

**SUBMITTED BY:**

Daniel Johnson, P.E., City Engineer
